Based in Mexico · EU Citizen (Germany) · Available for relocation ·  
English (Fluent) · Spanish (Native)

---

### PROFESSIONAL SUMMARY

---

Technical Project Manager with 7+ years managing platform operations, infrastructure, and distributed teams. Reduced infrastructure costs 72% (\$1,800→\$500/month), maintained 99.9% uptime for video streaming platform, and independently rescued production systems when development team departed. Proven ability to learn rapidly under pressure, own complex technical operations, and lead remote teams effectively.

**Seeking full-time remote role** (\$3K-5K/month) where infrastructure ownership, operational excellence, and problem-solving are valued.

---

### KEY ACHIEVEMENTS

---

- Reduced infrastructure costs **72%** through CDN redesign and vendor consolidation
- Executed **5+ zero-downtime migrations** for production video streaming platform
- Independently took over server operations when dev team left—learned on the fly, kept platform online
- Onboarded **1,000+ users** and grew community to **7,000+ subscribers**

- Managed budgets, vendor contracts, and payment systems with zero trust violations
- 

## TECHNICAL SKILLS

---

**Infrastructure & DevOps:** Linux server admin, Nginx, Cloudflare, CDN architecture, BunnyCDN, Wasabi S3, IPFS, ZFS, HLS/DASH video encoding, cost optimization

**Operations & PM:** Release management, QA frameworks, incident response, post-mortems, vendor management, budget oversight, technical documentation, remote team leadership

**Tools:** GitHub, Linear, Jira, Notion, VS Code, Google Workspace, WordPress, HTML/CSS, API integrations, workflow automation

**Soft Skills:** Rapid learning, ownership mentality, calm problem-solving, async communication, stakeholder management

---

## PROFESSIONAL EXPERIENCE

---

### Technical Project Manager | 3Speak (Video Streaming Platform)

*Remote · Feb 2021 – Oct 2025*

Platform serving 500+ daily active users. Evolved from community liaison to primary technical operations lead.

**Infrastructure & Operations:** - Independently managed full server operations when main dev team departed - **Reduced monthly costs 72%** (\$1,800→\$500) by redesigning CDN/storage architecture - Executed **5+ infrastructure migrations** with zero critical downtime - Restored platform stability during 6-month crisis period - Technologies: Linux, Nginx, Cloudflare, BunnyCDN, Wasabi S3, IPFS, HLS/DASH, ZFS

**Day-to-Day Delivery:** - Managed end-to-end QA for video hosting, encoding pipelines, payments, community features - Coordinated release cycles, post-incident reviews, corrective action tracking -

Built automated video encoding and recovery workflows - Handled vendor contracts, infrastructure billing, operational budgets - Bridged communication between developers, leadership, and user community

---

### **Co-founder & Technical Lead | Mantequilla Soft (Open-Source Organization)**

*Remote · Nov 2025 – Present*

Open-source GitHub org consolidating infrastructure for multiple platforms. Volunteer initiative.

- Coordinate architecture across **35+ repositories** with team of 5 developers
- Lead release management, QA, incident response for platforms serving **500+ DAU**
- Developing infrastructure-as-a-service concepts for third-party integration

**Note:** Volunteer project. Currently seeking full-time paid employment.

---

### **Founder & Project Lead | Proyecto Aliento (Creator Education Initiative)**

*Remote · Apr 2020 – Present*

Education and onboarding initiative improving user retention in digital platform ecosystem.

- **Onboarded 1,000+ creators** through designed curriculum and workflows
- Grew community to **7,000+ subscribers** focused on long-term engagement
- Managed volunteer team across content, education, community support
- Designed incentive systems reducing early-stage user drop-off
- Collaborated with technical teams to align platform updates with user needs

**Career arc:** Content Creator → Community Manager → Project Lead  
→ Technical Coordinator

---

## **Community Manager → Technical Support | Steem/Hive Ecosystem**

*Remote · Feb 2018 – Mar 2020*

Entry into digital platform operations. Content creation, community coordination, technical support.

- Supported users with technical setup and digital tools
  - Video editing, graphic design, meeting facilitation
  - Built “learning by doing” habit through hands-on practice
- 

## **WHAT I BRING**

---

**Learning Agility:** Self-taught every technical skill—when I don’t know something, I figure it out fast

**Ownership:** Don’t escalate problems I can solve. Finish what I start

**Hybrid Profile:** Technical enough for engineers, operational enough for processes, human enough for teams

**Remote-Native:** 5+ years async work across time zones—self-directed, proactive communication

**Resourceful:** Consistently do more with less without sacrificing reliability

---

## **EDUCATION**

---

**Self-Taught Technical Background** — All knowledge from hands-on experience: - Linux system administration & DevOps (managing live production infrastructure) - Video encoding, CDN architecture, distributed storage (maintaining streaming pipelines) - Project management frameworks (applied across multiple projects since 2020) - **Currently learning:** AWS/GCP, Kubernetes, CI/CD, AI/ML tools

---

## WORK AUTHORIZATION

---

EU Citizen (Germany) — eligible for immediate EU employment |  
Open to US/Europe relocation | Available for 100% remote roles  
worldwide | **Immediate availability** (2 weeks notice)
